

LifeSaverGroup™
CareNotesOnline™
928-208-4820

There was a time when our senior family members either lived with us or near us, but with modern nursing homes & a transient society we find our loved ones are often many miles apart. CareNotesOnline™ allows us to:

- ✓ Communicate with client families effortlessly
- ✓ 24-7 client access to caregiver notes
- ✓ Easy documentation of services performed
 - Daily list of caregiver activities
 - Notes about medical needs
 - Log of caregiver attendance
 - Caregiver personal notes about client
 - Transportation logs
 - Daily activity checklists

CareNotesOnline™ bridges the communication gap between family members and loved ones in the care of home healthcare agencies or nursing homes by making a caregiver report available online or by smart phone 24 – 7. A client's family can log into the Internet site or scan the QR code on their smart phone and view care notes that include the activities that have been performed such as bathing, meal preparation, transportation and dressing. In addition, the home healthcare agency caregivers can include personalized health care notes or caregiving notes to help the family keep in touch with the needs and desires of the client.

For example, the caregiver can indicate that the client needs to have an appointment with the dentist, cardiologist, or complaining of frequent headaches. **CareNotesOnline™** provides an excellent way for home healthcare agencies to document the services that are provided to clients which can be used for health insurance carriers or referrals to other healthcare providers. The primary focus of **CareNotesOnline™** is the creation of daily notes that summarize the care being provided to the client. **CareNotesOnline™** also integrates seamlessly with **LifeSaver App™** to create a complete online medical record that can be used for emergency medical situations or for ongoing physician visits. www.carenotesonline.com
